

GAR-Influenced Bred Commercial Heifers

Updated 1/14/2021

The 135 commercial females will sell in two groups. Group #1, 103 head, is safe in calf to GAR Breakthrough. Group #2, 32 head, is safe to GAR Sure Fire. The females have been genomic tested using Method Genetics Choice. Because the MG database is derived from information supplied primarily by GAR seedstock and commercial herds, the MG genetic breeding values and indexes serve as a BENCHMARK for GAR customers. Simply put, the Method Genetics evaluation benchmarks our cattle and the cattle of our customers who participate in the MG program against one another.

This is an elite population of Angus cattle selected for reproductive efficiency, calving ease, docility, postweaning growth, feedlot performance and carcass value. These young females will make excellent replacements! The females will sell in minimum 10 head groups. Buyer can take 10 head or more, but must take a minimum of 10 head. **Groups will sell consecutively, first to last. The groups qualify for FREE DELIVERY AND REPEAT BUYER DISCOUNT!**
