

GAR-INFLUENCED COMMERCIAL FEMALES

The 73 commercial females will sell in two groups, bred AI 11/12 and 12/1/21 to GAR Home Town. The Group #1 females have been genomic tested using Method Genetics Choice. Because the MG database is derived from information supplied primarily by GAR seedstock and commercial herds, the MG genetic breeding values and indexes serve as a BENCHMARK for GAR customers. Simply put, the Method Genetics evaluation benchmarks

our cattle and the cattle of our customers who participate in the MG program against one another. This is an elite population of Angus cattle selected for reproductive efficiency, calving ease, docility, post weaning growth, feedlot performance and carcass value, NOT THE AVERAGE ANGUS ANIMAL. Buyer must take 10 head minimum, but may take the entire group. **FREE DELIVERY.**
